THE GLOBAL TILE & STONE EXPERIENCE

HİTİT SERAMİK

This is a story of
passion

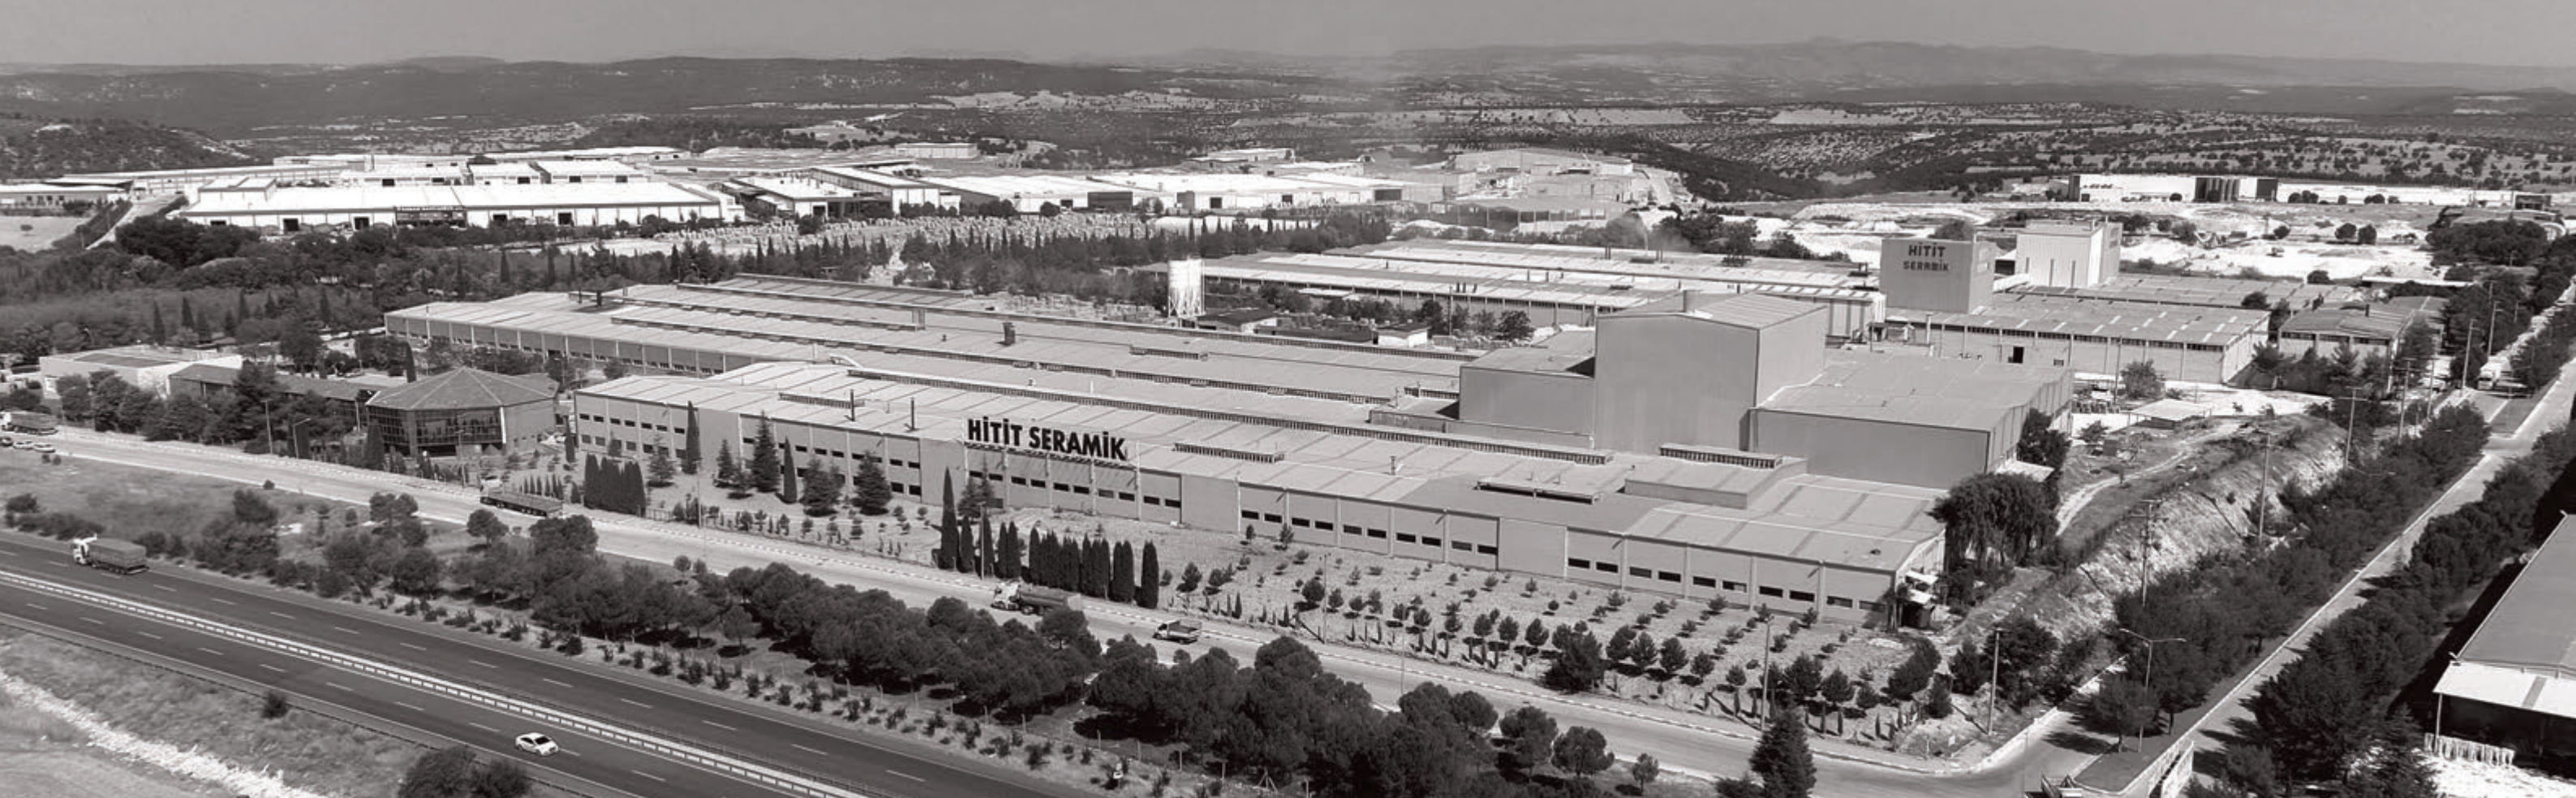

The story of our world is
written in stone.

At Hitit Seramik, we bring
the timelessness of stone into
the modern world with our
contemporary, eco-friendly
ceramics.

An aerial photograph showing a large industrial facility with several long, rectangular buildings and a complex network of pipes and structures. In the foreground, a dense, expansive forest of tall, thin trees covers a significant portion of the land. The image is in black and white, emphasizing the textures of the industrial roofs and the forest canopy.

Our 140,000 square-meter plant occupies 50 hectares of land in the Uşak Organized Industrial Zone in the heart of Anatolia; home to the *Hitit Forest of forty thousand coniferous pines*, awarded an Environment Certificate by the Ministry of Environment.

The history of
Hitit Seramik showcases
our exceptional, cutting
edge products...

Established on October 17, 1989 for the production of Ceramic Floor and Wall Tiles, Hitit Seramik Sanayi ve Ticaret A.Ş. started its activities on February 22, 1991 with a total capacity of 2 million m² including 1,000,000 m² wall tiles and 1,000,000 m² floor tiles in the first stage on 500,000 m² land located in Uşak Organized Industrial Zone. Hitit Seramik grew rapidly as a result of the new investment activities that accelerated following installation and production and the production capacity of 10 million m² was achieved in the 76,000 m² enclosed factories complex within a short period of time.

Capacity and product type increase was required and so, a decision on new investments was made in 2004 and works were started rapidly in the face of domestic and international markets' trust and intense demands of Hitit Seramik products, brand, and quality in the 2000s. 40,000 m² of additional closed factory buildings were built and completed with the company's own resources in a short period of time and 20 million m² capacity was achieved by reaching additional production capacity of 10 million m².

The objective was to present new and pioneering products

that can be produced with special technologies and machines for Turkey and world markets by conducting extensive research in investment studies and this has been achieved. Hitit Seramik has become one of the rare production facilities of the world that can produce the most sizes and types of coating materials in a production facility today with the power of its new investments.

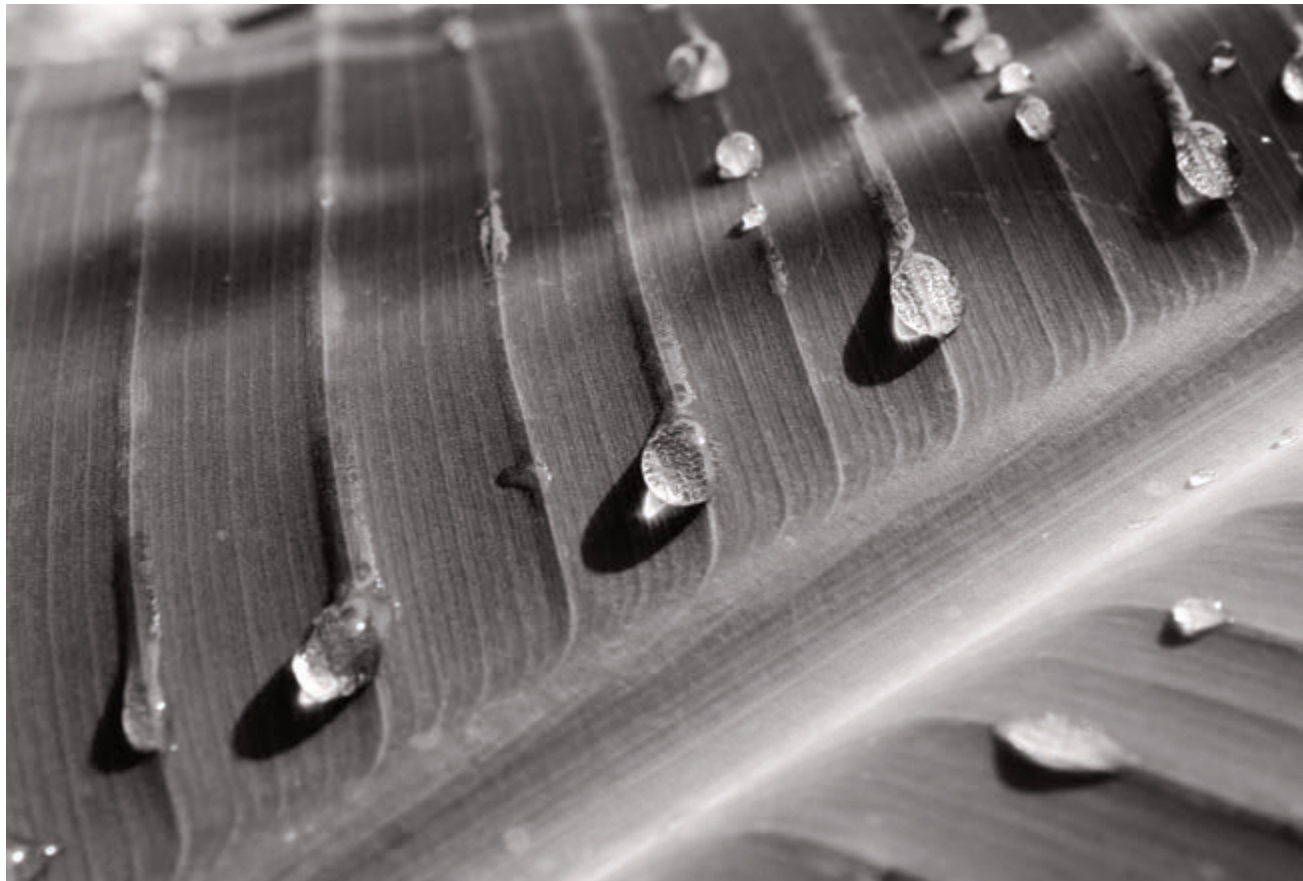

These targets of Hitit Seramik, which always aims to produce the cutting edge and exceptional products, were achieved by identifying the needs of the user accurately, capturing

innovative and creative approaches to respond to these constantly changing needs, creating a competitive structure within itself, conducting rigorous and forward-looking research in all investments, selecting the right technology and machinery, allocating large financial resources, and exhausting, but inciteful studies.

SAY ‘HI’ TO
HIGH HYGIENE TECHNOLOGY

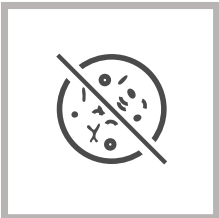

Paving
the way for
innovation,
we are here
to improve
people’s lives...

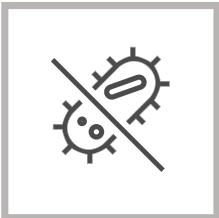

Being inspired by hydrophobic, water repellent feature of lotus leaves, Hi-Hygiene technology, which was developed at Hitit Seramik laboratories as a result of long R&D studies, does not allow bacteria formation with a molecular impact thanks to its special formula which is applied on the porcelain and ceramic surfaces. Hi-Hygiene technology provides anti-pollution surfaces. It enables the applied surfaces to be easily

cleaned by using less water and chemicals. It does not contain nano-silver and its water-based content does not harm humans, animals and environment health. It contributes to the maintenance of the ecological balance of the world.

Hi-Hygiene Technology can be applied to all Hitit Seramik products and is proved to be 99.9% efficient by internationally accredited laboratory tests.

Protection

A sustainable future...

Our R&D facilities continue to reduce environmental and air pollution through recycling. We purify and re-use 10,000 cubic meters of water daily. As one of the first companies to implement the Kyoto Convention in Turkey, we have redesigned our entire manufacturing process with a green perspective and constructed a re-use and product processing facility that reduces waste. The products utilised here constitute an environmentally-friendly option offered under the Hard Rock Ceramic brand.

Covering the *world...*

We are shaping the future with our expert staff, high technology and intensive R&D studies at every stage of production. We present our passion to the world by growing rapidly with our global brand networks.

From Europe to the Middle East, and from Africa to America, our brand Homeworks continues to strengthen its place in world markets with its products every day. A master in blending experience and innovation,

Hitit Seramik
continues to
shape the future
with *passion*
and *confidence*.
